Generate PDF (without Template)

| | |
|-----------------|---|
| URL | https://urlprintify/createpdf |
| Function | Generate pdf directly based on data send. JSON Request follow table patern (row and column) |

Data Mapping

| | Field | Description | Option |
|----|---------|--|--|
| 1 | size | To set the paper size | A4,A5 |
| 2 | pages | Set more than 1 if need multiple pages. Consists of array of page | |
| 3 | lines | Consists of array. Same in row in table | |
| 4 | columns | Array of column. This is the content value placed. | |
| 5 | rowspan | Column property. To set rowspan (handle merge cell). | |
| 6 | colspan | Column property. To set colspan (handle marge cell). | |
| 7 | type | type data of the field. Printify now already can support text and image. | text,img |
| 8 | value | This is the content value placed. | value text of type is text. If type is img, use base64 format. |
| 9 | width | width of column | |
| 10 | height | height of column | |
| 11 | style | style of the column. split by comma | center,bold |
